#### Author's Note

**FileShare-1** 

**Scraper Pulling:** A flexible method to obtain a particular record and return from a database with a single line of code. However, the data returned is not the original record but a copy. **Original pulling and return:** means a record is pulled in a file, and all the data is returned as requested. Almost all database languages provide a means to return the original record.

Reproduction of this article is permitted in any format, provided the original work is properly cited.
